Thanks for putting this out there, James.

Just wanted to add that DEQ has not yet received a response from the applicant regarding our comments on the proposal submitted Jan 21, 2010 (aside from notification that the applicant prefers not to pay the invoice until the Corps process moves further along). The concerns DEQ posed will require some discussion and likely more data for analysis.

It would be great to have all the agencies at the table with the applicant(s) to start these discussions and, perhaps, align agencies needs. While the requested information is critical to DEQ's ability to complete the 401 evaluation, collaboration is likely to assist in bringing all the decisions to resolution sooner. This is especially true given the context of the Portland Harbor and the agencies' agreements to coordinate on issues there.

I put my availability into the poll and look forward to finding a time that works for us all to participate. Thanks again and have a nice weekend.

Subject: MTG REQUEST.: K-M Linnton and Willbridge Terminals

Gentlemen,

We met with Oregon Department of Environmental Quality (Alex Liverman and Corey Saxon) and EPA Region 10 (Jonathan Freedman and Chip Humphrey) last week regarding permit actions in the Portland Harbor Superfund reach of the Lower Willamette River (River Miles 0-14). Kinder-Morgan's projects came up in the discussion.

DEQ has several questions regarding these projects. According to my conversations with them, they have a lot of outstanding information that is needed for them to conduct their review and issue the Clean Water Act Section 401 Water Quality Certification. Additionally, since you are proposing upland disposal, there may be other information requirements under DEQ's Solid Waste Authority.

The Corps is requesting a meeting between Kinder-Morgan and the agencies (the Corps, DEQ, EPA, and NMFS) at our office to clarify our regulatory processes so we can move towards finalizing our permit review.

I would appreciate it if you and the agency representatives would follow this link to select available times: **Non-Responsive**

Thank you.

Regards,
James M. McMillan
